DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, circuitry adapted to produce a signal, the timing device, and the alarm device must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. The abstract of the disclosure is objected to because the abstract must be a single paragraph and not longer than 150 words. Correction is required. See MPEP § 608.01(b).

The current abstract is two paragraphs.

Allowable Subject Matter

3. Claim 1 is allowed.

Art Unit: 2856

4. The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach and/or suggest a sound sensor comprising a jingle bell in combination with a microphone enclosed in open ended resilient capsules adapted to be placed in telescopic form to form a closed chamber around the jingle bell and microphone.

The closest prior art is that of **Morgan (US 4,322,714)** and **Suzuki et al. (US 4,527,153)**. **Morgan** teaches a vehicle anti-theft alarm which monitors a ball within a steel enclosure for either vibrations or the sound of the ball hitting the steel enclosure. **Suzuki et al.** teaches placing a magnetic ball as the clapper of a bell (see Figure 18) and monitoring the bell for sounds produced by the vibration of the clapper. There is no teaching of enclosing a bell, particularly a jingle bell, and a microphone in a resilient chamber in order to monitor movement of the sensor or the object to which the sensor is mounted.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Damon (US 1,332,613) discloses a theft alarm for motor vehicles which utilizes jingle or sleigh bells.

Morgan (US 4,322,714) discloses a vehicle anti-theft alarm device with a ball inside a steel enclosure.

Suzuki et al. (US 4,527,153) discloses various detectable element and sensor combinations.

Laing (US 4,723,447) discloses an inertia-sensitive device with a vibrational pickup.

McGregor (US 5,986,548) discloses a radio-linked intrusion alarm system.

Art Unit: 2856

Mollet et al. (US 2003/0122039 A1) discloses a system for remotely monitoring the operating status of a railroad grade crossing warning equipment that includes a microphone for monitoring the activation of the bell within the system.

6. This application is in condition for allowance except for the following formal matters:

The objection to the drawings put forth above and the objection to the abstract put forth above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
